ABOUT MABBLE LIGHTS

Mabble lighting was started in October 2014 with the aim to bring in economic products with maintained quality and warranty standards. The focus was on both the aspects i.e. the warranty and the quality. Balancing the mentioned two aspects is what gave rise to the brand 'Mabble'.

There were a large set of difficulties faced in the initial stages to nurture and bring up the name of the brand. Keeping calm and having full confidence in the scope of the products, this brand continued and made a great impact in the market. An impact so hard that everybody started to flood the market with economic products and clones.

Mabble means 'to wrap up'. Almost all basic clients were into selling cheap and unbranded products, but this brand just wrapped up selling of such goods to an extreme level. Hence the name 'MABBLE', The tagline 'smart lighting, smart ideas' was later added.

Advanced technology, energy efficiency and durability puts Mabble ahead of the competition. They are developed specially to optimize their output, outshining many other lights in the market. Mabble offers a wide range of quality LED lighting solutions, for varied applications providing effective and energy-efficient lighting in any environment. Their usage ranges from residential and retail to commercial and industrial applications. As the future unfolds, Mabble plays a pivotal role in shifting usage from power-hungry conventional and CFL lighting to LEDs.
