Feel the Breeze, Be at Ease!

A woman with long, wavy hair is captured in a dynamic, artistic pose. She is wearing a dark, sleeveless, floor-length dress that flows around her. Her right arm is raised high, and her left hand is positioned near her waist. The background is a solid, dark color, creating a high-contrast, moody atmosphere. The lighting highlights the contours of her body and the texture of the fabric.

Technical Advice

Ceiling Fan Selection

How to select your fan?

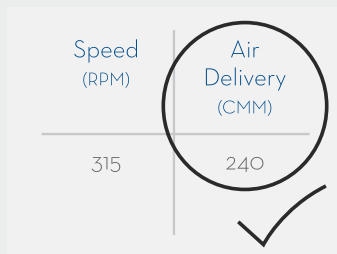

Sweep Size is referred to the entire diameter of a fan.

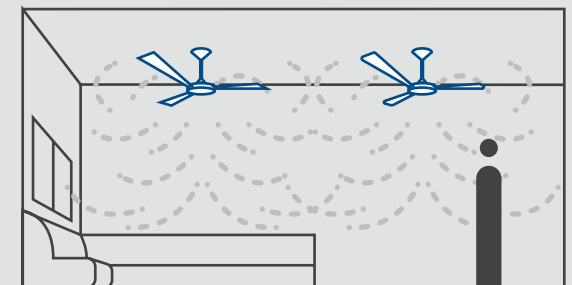

More fan blades do not give better air flow.

A four or five blade ceiling fan provides a more conventional, balanced look, whereas a fan with two or three blades possesses a modern and sleek style.

Higher RPM does not mean higher air flow. Air flow / Air delivery is the only point of comparison in selecting a ceiling fan.

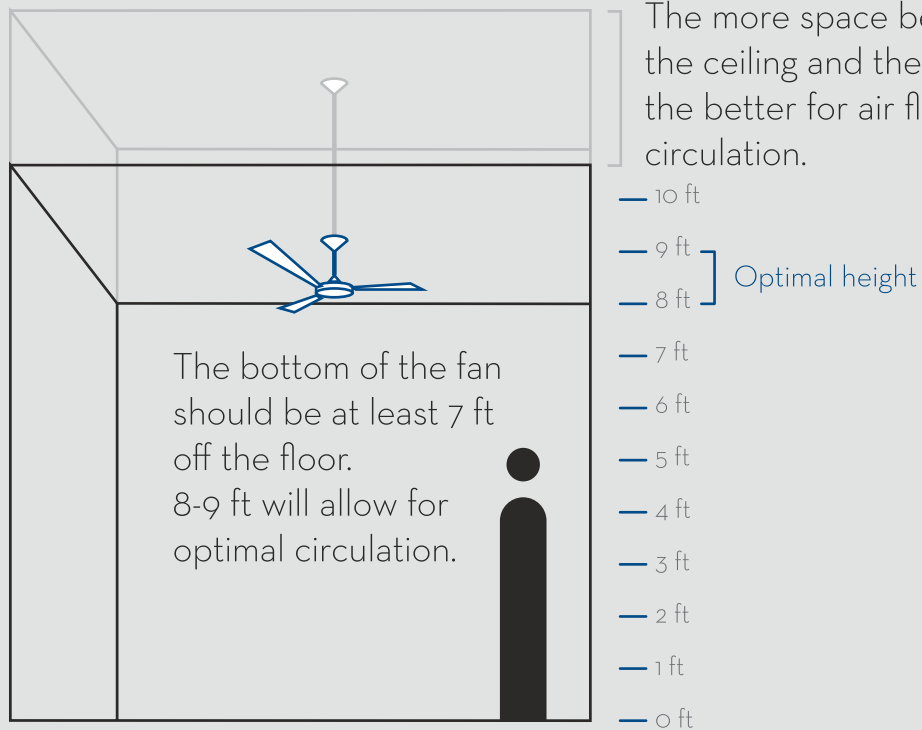

Sweep Size	Room Size
600 mm (24")	Small shop, cabin or Powder Room
750 mm (30")	6 X 10 ft
900 mm (36")	7 X 10 ft
1050 mm (42")	10 X 10 ft
1200 mm (48")	12 X 13 ft
1300 mm (52")	13 X 14 ft
1400 mm (56")	14 X 16 ft

For a much more larger room, consider using two fans to balance the air circulation in all parts.

Optimal Height

For ceilings that are taller than nine feet, add 6" to the downrod for every foot of height.

Energy Efficiency

Lower electricity consumption means higher savings. The more stars there are, the more your savings are.

A blurred background of a kitchen. In the foreground, a black stove with two glowing orange burners is visible. Above it, a white countertop and a backsplash are partially seen. In the background, there are wooden cabinets and shelves with various items, all out of focus. The lighting is warm and soft.
