Solutions for Sports Floorings, Infrastructure and equipment's

Following are the International Brands which we are proud to represent exclusively in India.

Tara flex® France

Multipurpose Indoor Sports & Gym Flooring

Taraflex® is the world's leading indoor sports flooring, has been installed worldwide in athletic facilities, educational buildings, residential recreation, fitness centers and religious institutions.

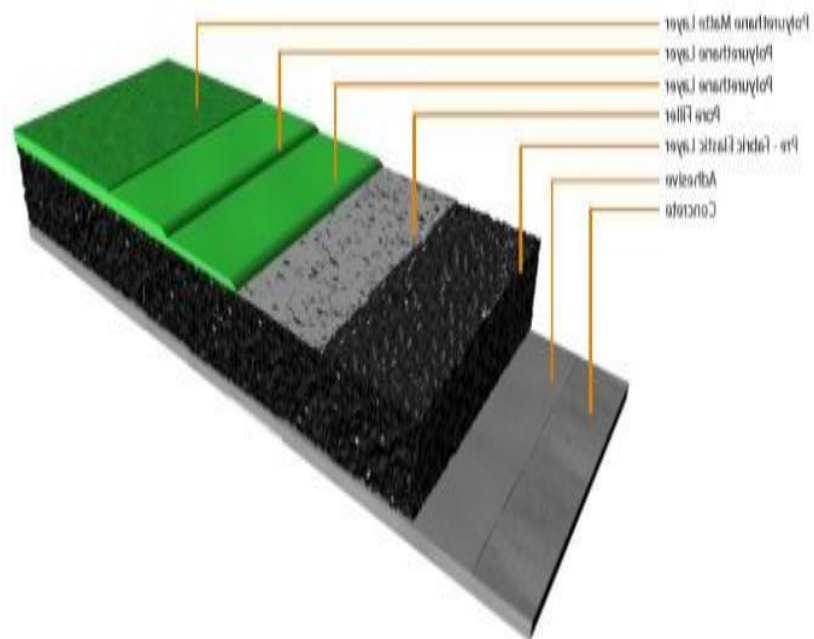

Gerflor's sports flooring expertise guarantees performance, comfort, safety and durability, result of which Tara flex® has been the official sports' flooring for all the Olympics since **1976**.

Product Range: Tara flex 'Sport Performance Plus's – 9mm Thick, Tara flex 'Sport M Plus's – 7mm Thick, Tara flex 'Action Sport' – 5 mm Thick, Tara flex

Acrylic all weather outdoor sports surface.

The Proflex system comprises a high quality prefabricated and specially formulated acrylic coating resulting in an extremely durable impervious surface offering maximum comfort and consistent ball bounce, as well as having excellent durability the cushioning effect will remain constant throughout seasonal temperature variations and over many years of use. The uniform thickness of the mat ensures true ball bounce on all areas of the court. The coating can be adjusted to meet the slip resistance requirements for other sports such as netball, basketball and five-a-side. This makes it the ideal surface choice for Multi Use Games Areas (MUGAs)

Synthetic sports flooring system for indoor & outdoor sports court

Plastic Comfort court 50 is a high-end multifunctional sports floor providing very good comfort and safety for training and competition combined with excellent resistance to mechanical loads. Thus, approved by F.I.B.A, I.H.F, F.I.V.B, I.T.F Application: Outdoor & Indoor, Training and competition of all common international ball and racket games, physical education, cultural events, exhibitions and a variety of non-athletic activities typical for multi-purpose facilities.

Wooden Flooring Systems

Wooden flooring system suits a lot of purposes and the environment. Tests carried out by SINTEF (formerly The Norwegian Building Research Institute) show that our wooden sports floor surpasses all its rivals when it comes to shock-absorption. The built-in shock-absorption is equally suitable for children's games and activities as it is for tackling the weight of heavy grandstands. Wooden sports floor is suitable for multi-purposes facilities, health and fitness studios and schools. Wooden flooring system is an environmentally friendly product based on natural and renewable resources.

Product Range: Pre-engineered Multipurpose Wood Floor System, hardwood floor system for Basketball, Badminton, Squash & various other Sports applications.

Squash Court

Squash Courts Approved by WSF

We provide the World class Squash Courts designed and constructed with combination of Plaster from “Rebound Hard plaster”, the free floating resilient wooden sports flooring system, “Free Standing Glass Back Wall” the most practical and popular choice and other imported accessories. The company’s wealth of experience assures you of getting the sound counsel ending up with the best facility your money can buy. Product Range: Hard Plaster, Maple Flooring, Toughened Glass, Sensor Tin & Metal Hardware

Artificial Turfs

We offer a range of synthetic turfs for various sports applications like Cricket, Soccer, Rugby, Hockey, Golf, Tennis areas and Multisport purposes, The products are specifically developed for top-class performances and meet the most stringent criteria and highest standards required for the sport. It will provide optimum playing comfort and maximum safety for players. In addition maintained costs are low and artificial turf offers a high durability. Club officials & associations have the assurance that the field is tested and approved.

Children Play and EPDM Play System

play system offers a safe comfortable surface to children. The basement is cast in place from rubber crumb and clear polyurethane binder and a topping of colored EPDM granule is applied, also using clear polyurethane binder. The completed system is porous to water.
