Godrej | LOCKS & ARCHITECTURAL FITTINGS AND SYSTEMS

FOR A SAFER, SMARTER LIVING EXPERIENCE.

INNOVATIONS FOR MODERN LIVING.

CUTTING-EDGE LOCKS, ARCHITECTURAL HARDWARE AND KITCHEN FITTINGS.

THE 5 SAFETY STRENGTHS:

To help you optimise your home's safety, we recommend that you pick the right safety strength depending on your home's unique safety needs. The higher the safety strength, the safer your home will be.

Safety Strength 1 - Basic Safety

Godrej Safety Strength 1 locks come with the conventional mechanical locking system through basic security systems which have levers, wafers, tumblers and single-row pin-cylinder technologies.

Safety Strength 2 - Ultra Safe Technology

Godrej Safety Strength 2 locks have highly precise computerised dimple keys with Advanced multi-row pin-cylinder technology. Here, the maximum number of combinations (key differs) that can be provided is up to 100 million, which makes each key unique and non-interchangeable with any other key.

Safety Strength 3 -Extra Safe Technology (EXS)

Godrej Safety Strength 3 locks come with Advanced, Angular multi-row pin-cylinder technology. The maximum number of combinations (key differs) that can be provided is up to 2 billion and a highly complex system of master key solutions is possible.

Safety Strength 4 - EVVA 3 Kurve System Technology (3KS)

The highest safety strength, Godrej EVVA, in mechanical locks, comes with a revolutionary EVVA 3 Kurve system technology (3KS) with a floating pin, sidebars and locking bar. This conforms to European standard EN 1303. The 30 trillion combination cycle means that a single key will not repeated for the next 30 trillion keys. Since there are not 30 trillion humans on the planet, it's virtually impossible for someone else to have an identical key as yours.

Safety Strength 5 - Advanced Digital Access Control Technology

Godrej digital locks are based on hi-tech electronic systems which give you multiple access modes, like wearables, like NFC, biometric, RFID card, etc., for convenience and enhanced safety.

Locks Maintenance Tips (Do's and Don'ts)

- Do not close the door/drawer/cabin when the bolt of the lock is extended/locked.
- Paints and varnish should not be used over locks as it may enter the lock parts and affect the smooth functioning of the lock.
- For cleaning/polishing of the lock do not use any chemicals.
- Do not use any lubrication oil for smooth functioning of the lock. Only use WD-40 or kerosene for the same.
- Do not apply excessive force to key while opening the lock.
- Do not use the key as a screw driver or a can-opener as it may damage the key.
- Avoid exposure of the lock to rain.
- The aesthetic part of locks such as handles should be installed after the decor work of the door/home.
- Always get the Installation/Repair done through Helpline/Authorized service provider.
